Project Name:	KitchenSync
Team:	Neon Nomads
Project Description:	KitchenSync streamlines your pantry management and meal planning seamlessly.
	For those with active lifestyles and families
	who find it challenging to keep up with their pantry inventory and curb food disposal,
	the KitchenSync
	is a sophisticated kitchen assistance platform,
	that enhances the management of your pantry and offers recipe options that fit your available ingredients, organizes meal plans, and reminds you of the shelf life of your food items,
	unlike conventional inventory systems and static shopping list apps
	our application intelligently adapts to your dietary preferences and schedule, guaranteeing the optimal use of your groceries and simplifying the meal preparation process.
Benefit Outcomes:	• A reduction in food waste through precise tracking of food inventory contributes to cost savings and environmental sustainability. • Increased efficiency in meal preparation with recipe suggestions tailored to existing pantry items, saving time, and reducing grocery shopping frequency. • Better adherence to nutritional goals thanks to a meal planner that considers needs and preferences. • A decrease in the risk of consuming expired foods due to reminders about when food items need to be used, ensuring freshness and safety.
